

AVID Recognised as Northumberland's Most Innovative Company 2015

AVID Technology Limited has picked up its second award for Innovation this year at the 2015 Northumberland Business Awards.

At an awards ceremony held on the 12th November 2015 at Linden Hall country house hotel. Attended by business leaders and senior public sector officials from across the county, Cramlington based AVID Technology Limited was recognised as Northumberland's most Innovative company.

AVID Engineering Director Dr Richard Fairchild and Finance Director Louise Fice collected the award on behalf of the company.

AVID designs and manufactures technology that improve efficiency and emissions of heavy-duty vehicles, through the electrification of ancillary systems sometimes called Mild or Micro Hybridisation. The company has developed unique and world leading IP in this area.

Managing Director, Ryan Maughan said: "I am very proud to have received this award, our second for innovation this year, it is a real recognition of the cutting edge work that AVID is doing."

Over the past 3 years ago the company has gone from strength to strength. Investing heavily in the development of its technology and business and can now count several leading global vehicle manufacturers amongst its growing base of customers.
